

Mitsubishi Motors Philippines Reintroduces the Iconic Versa Van

Mitsubishi Motors Philippines Corporation (MMPC) proudly announces the introduction of the new Mitsubishi Versa Van, a much-awaited return of an iconic nameplate that has long been associated with versatility, durability, and dependable performance. With its return, Versa Van is once again set to become a reliable partner for organizations and businesses that move people every day.

The Mitsubishi Versa Van traces its roots to the legendary Mitsubishi Delica, a van platform engineered to transport both people and cargo with ease. First introduced to the Philippines in 1987 as the L300 cab chassis, the original Versa Van version quickly became a familiar sight on roads and trusted companion of Filipino families. Decades later, the Versa Van returns, reengineered to meet today's passenger transport needs while staying true to the values that made it iconic.

Designed primarily as a people-mover, the new Mitsubishi Versa Van is ideal for small to medium-sized businesses that require reliable and efficient passenger transportation. These include tourist transport operators, school service providers and companies offering employee or guest shuttle services, among others. Its spacious interior, practical layout and proven diesel performance make it a smart solution for daily business operations.

A Trusted People-Mover To Support Growing Enterprises

Powering the Versa Van is a 2.5-liter diesel engine that delivers 129 PS/3,200 rpm power and 356 N-m/1,400 to 2,000 rpm torque. Paired with a 5-speed manual transmission, the new Versa Van is ideal for frequent stop-and-go driving and fully loaded passenger transport. It also features a 15-seater capacity (including the driver), allowing businesses to transport more passengers efficiently while maintaining comfort and accessibility.

Built with business practicality in mind, the Mitsubishi Versa Van offers several advantages that enhance daily operations. Easier maintenance access is made possible through thoughtful placement of key maintenance components, helping reduce service time and downtime.

Apart from the owner/driver convenience, the van is also packed with passenger-friendly features. It provides excellent roominess and accessibility, with seats and steering wheel designed for easier adjustment, as well as foldable seats that enable smoother passenger movement and entry/exit routes. Passenger comfort is also further enhanced by the dedicated air outlets mounted on the ceiling for each seat row, ensuring consistent airflow throughout the cabin.

The Versa Van also excels in luggage capacity, offering a generous space for cargo. Its larger rear door opening allows easier loading and

unloading of luggage which could be an important benefit for tourism and shuttle operations.

The Mitsubishi Versa Van is available in GLX MT variant priced at P1,649,000. Colors available are Silver Metallic and White Solid.

With the return of the Mitsubishi Versa Van, MMPC reaffirms its commitment to empowering Filipino entrepreneurs and businesses with vehicles that are built to last and designed to perform. Backed by Mitsubishi Motors' legacy of durability and reliability, the new Versa Van is ready to once again become a trusted partner on the road, supporting businesses toward growth and success.

ACMobility and Robinsons Malls Partner to Expand Nationwide EV Spine Network

The new partnership brings more EV charging stations to key cities across the Philippines

ACMobility, a leading provider of electric vehicle (EV) charging solutions and infrastructure in the Philippines, has partnered with Robinsons Malls, one of the largest shopping malls and retail operators in the country, to further expand its EV network nationwide. This collaboration aims to support the growing adoption of electric vehicles by addressing range anxiety and making EV charging more accessible, particularly in key provincial areas.

“As one of the country's leading mall operators, Robinsons enables us to further scale our EV network through the deployment of charging infrastructure in highly accessible, high-traffic locations,” said Carla Buencamino, Head of Mobility Infrastructure at ACMobility. This partnership supports our broader goal of building a reliable, nationwide charging backbone that addresses range anxiety, strengthens connectivity between cities and provinces, and gives more Filipinos the confidence to adopt EVs as part of their everyday mobility.”

Powering Up in Key Robinsons Malls, From Luzon to Mindanao

As an initial deployment, ten EV charging hubs will be launched and all fully operational by the first quarter of this year, each equipped with two 22kW charge points (except for Robinsons Butuan which is equipped with two 7kW charge points). Currently, five hubs are already operational, located in Robinsons Malls in Ilocos Norte (Luzon); Iloilo, Roxas, and Dumaguete (Visayas); and Pagadian (Mindanao).

Soon, additional hub locations are set to open in Luzon and Visayas at Robinsons Tuguegarao, Santiago, La Union; and in Antique.

In Mindanao, Robinsons Iligan, Butuan, and Valencia. Once operational, this station will become one of the northernmost EV charging stations in ACMobility's growing Philippine EV Spine Network to date.

This partnership not only extends ACMobility's geographic footprint, but also reinforces Robinsons Malls' role as a forward-thinking and environmentally responsible developer that responds to the changing needs of its communities. By integrating EV charging infrastructure into its malls, Robinsons continues to evolve as a destination that not only delights customers but also contributes to a cleaner, greener future.

Boosting Accessibility and Expanding ACMobility's Philippine EV Spine Network

Building on its growing network, this partnership also reinforces ACMobility's commitment to developing a robust EV Spine Network that ensures convenient access to charging stations nationwide, from Pagudpud in Luzon to Pagadian in Mindanao. Through this strategic expansion along major routes and destinations in the country, ACMobility is helping make EV ownership more practical, accessible, and reliable for drivers nationwide.

All stations under the network can be easily located using ACMobility's partner e-mobility service provider, Evro. Evro is an all-in-one EV charging app which offers features such as the Station Finder feature, real-time availability tracking, navigation assistance, and in-app payment options, helping users charge with ease and confidence.

Buencamino said the new charging stations are intended to support the growing number of EV users and encourage more Filipinos, especially those in the provinces, to switch to electric vehicles. She added that this is only the beginning, with more charging infrastructure planned for key cities as demand continues to rise.

“We want to break the misconception that EVs are only suited for city driving. By bringing these facilities closer to regional communities, we are sending a clear message: owning an EV is practical and sustainable, no matter where you live. With Robinsons Malls supporting this cause, we are confident we can bring this infrastructure to more people across the country,” Buencamino shared.

Kia Celebrates Every Journey with February Deals

Enjoy up to P370,000 off on the Kia Carnival Diesel, with special offers on the Kia Sorento

This February, Kia Philippines invites everyone to celebrate life's meaningful journeys, from daily commutes and spontaneous weekend escapes to milestones shared with family and loved ones. Kia honors all the moments that bring us closer with exclusive February deals for select models. From fuel-powered models, efficient hybrids, and fully electric vehicles, Kia offers a range of choices designed to move with every lifestyle and every new beginning.

The Kia Sonet: Your Match for a Life in Motion

Move through your day with a companion that feels easy to live with through planned and spontaneous events. The Kia Sonet, including the limited-edition K-Style variant, slips naturally into your routine, keeping pace with busy mornings, casual meet-ups, and weekend escapes. It brings a quiet and fuel-efficient sense of confidence to your everyday driving. Thoughtfully sized for city life and beyond, the Sonet suits young professionals, first-time car buyers, creatives, and explorers who appreciate flexibility and personality. With its bold design, elevated ride height, and intuitive technology, it supports a relaxed, lifestyle-led drive that makes even ordinary journeys feel a little more special.

The Kia Sorento: Your Match for Life Together

From February 14 to 28, during the Lunar New Year celebration, enjoy a limited-time offer of Php 150,000 to 200,000 in savings on the Kia Sorento Turbo Hybrid, making it the perfect time to bring home a companion for every journey. Designed for families and couples alike, the Sorento moves through busy days, quiet evenings, and everything in between. It offers a place to relax and a sense of peace of mind through its advanced safety features, allowing ordinary drives to become meaningful shared memories. As a flexible 7-seater hybrid SUV, it is equipped with a panoramic curved display and a thoughtful interior that creates a space where conversations flow naturally and where memories are made. With advanced safety systems and a panoramic sunroof, every journey feels more shared and memorable.

The Kia Carnival: Everyday First-Class for Moments That Matter Most

Start the Lunar New Year on a note of comfort and togetherness with the Kia Carnival. From February 14 to 28, enjoy Php 370,000 in savings on the Kia Carnival SX Diesel, making it an ideal way to make every family journey into an everyday first-class experience. The Carnival creates a space for shared moments, turning daily routines, weekend trips, and longer drives into experiences that feel thoughtful and welcoming. With its spacious and flexible cabin, leather-appointed seats, and dual power sliding doors, everyone feels at home, while its efficient diesel or hybrid drivetrain delivers strong, dependable performance for journeys both big and small.

Kia EV9: Your EcoSmart Companion for the Journey Ahead

Move through each journey with a partner that blends sustainability, technology, and capability for your family and everyday life. The Kia EV9 answers that call as the brand's flagship fully electric SUV. It fits into the lifestyle of individuals who value eco-consciousness and innovation. It blends elegance with intelligence into one award-winning package, making every ride effortless and inspiring. Its luxurious cabin, made of sustainable materials and advanced technology, presents a place where everyone can feel connected. With its impressive driving range of over 500 kilometers on a full charge, the EV9 can confidently go anywhere you need to go, supported by ACMobility's expansive EV charging network. As a companion through life, the EV9 reflects your values and supports the transformative mobility future that your family is building. It turns each drive into a shared experience worth remembering.

Every journey feels richer with the right partner, and this February, Kia helps you find the one that moves with you and makes every drive a memory worth keeping. Visit any Kia dealership to take part in Kia's Lunar New Year celebration and enjoy special savings on the Sorento Turbo Hybrid and Carnival Diesel, making it the perfect time to start creating more moments together.
